

The All-in-One Choice – ZULTYS – it just makes sense

Houston Voice Solutions provides end-to-end communication needs – chooses Zultys to replace Telrad Connegy with Zultys IP PBX.

SUNNYVALE, CA, December 10 2008 – Zultys Inc., a leading provider of All-in-One Unified Communication solutions today announced that Houston Voice Solutions has chosen Zultys as their flagship VoIP solution after carefully reviewing a number of other vendors. Randy Nelson, President of Houston Voice Solutions, stated, “To sum it all up, the Zultys product is so well-rounded and complete that the fit for 10 users up through 100’s of users is fantastic. Zultys provides unified communication as an all-in-one solution.” As the Value Added Reseller market looks for alternatives to other vendors who are exiting the business, the market is increasingly turning to the Zultys all-in-one solution.

It’s easy to buy, it’s easy to install and it’s easy to use and manage.

Houston Voice Solutions has experienced the benefits of a solution like the MX portfolio of Unified Communications products for themselves, having been forced to move their business location three times since Hurricane Ike swept through Houston. The Zultys MX solution delivers real disaster recovery to customers by providing the benefits of Voice Over IP with only a handset required in your local office and all common equipment miles away in a safe hosting environment.

Randy went on to say, “What the market is only now realizing is that Zultys does in one box what other competitors require 5 or more boxes to provide – as a responsible

communications vendor helping my customers be 'green,' this means a lot to me. With the reduced power consumption of a single server, it just makes sense."

Zultys (<http://www.zultys.com>) is committed to designing innovative products that add value for users. Zultys' unique approach to delivering enterprise class solutions based on the Session Initiation Protocol (SIP) is centered around a single-server architecture, which demands far less hardware, consumes less power resources, and generates significantly less ambient heat. All Zultys products are designed to maximize investment, interoperability and usability. With its ability to respond quickly to evolving market needs and provide expert technical support worldwide, Zultys is the choice of discerning value added resellers and clients the world over.

About Zultys Inc.
